

Re-designing UberEats

Problem 1 - Limitations on Filters

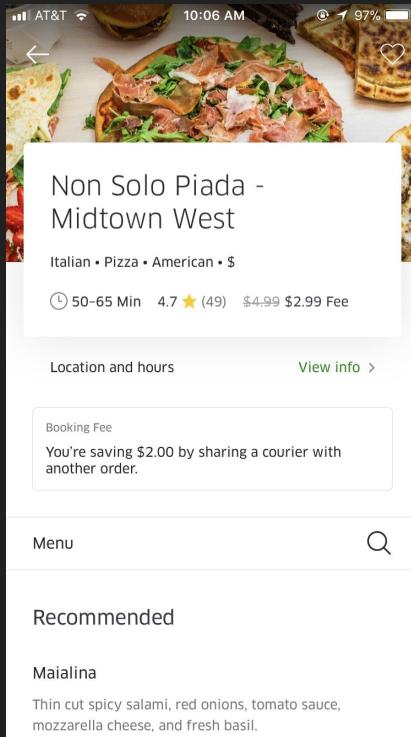

Problem 2 - Search Tab

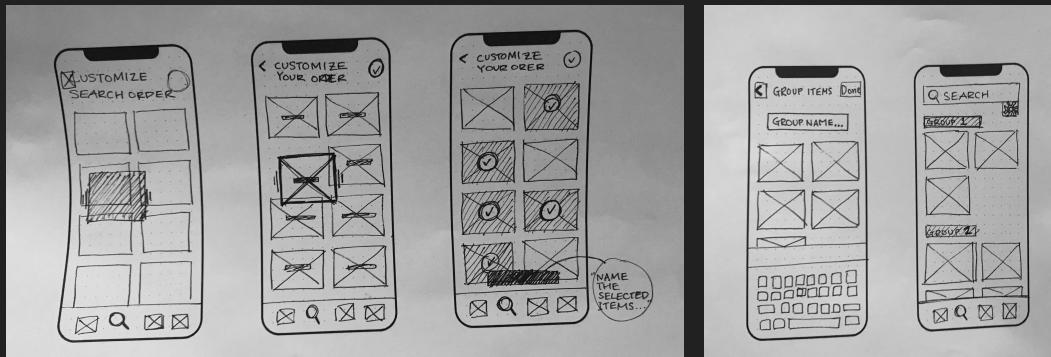

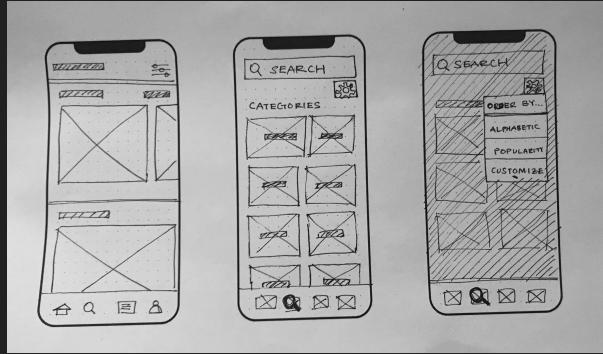

- Repetitive categories
- Nonsensical order
- Text on top of an image

Problem 3 - Reviews & Ratings

- Non-tappable reviews
- Do not know how the ratings are rated

Initial Wireframes

User Tests Evaluation

Filter

- Good to have slide bar with range controls
- Like to have both recommended shortcuts and full functionalities

Search

- Too much work to customize categories
- Still nonsensical order of categories

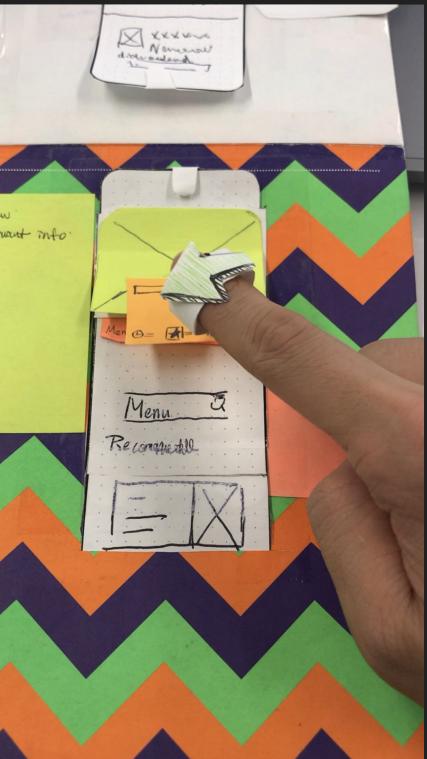

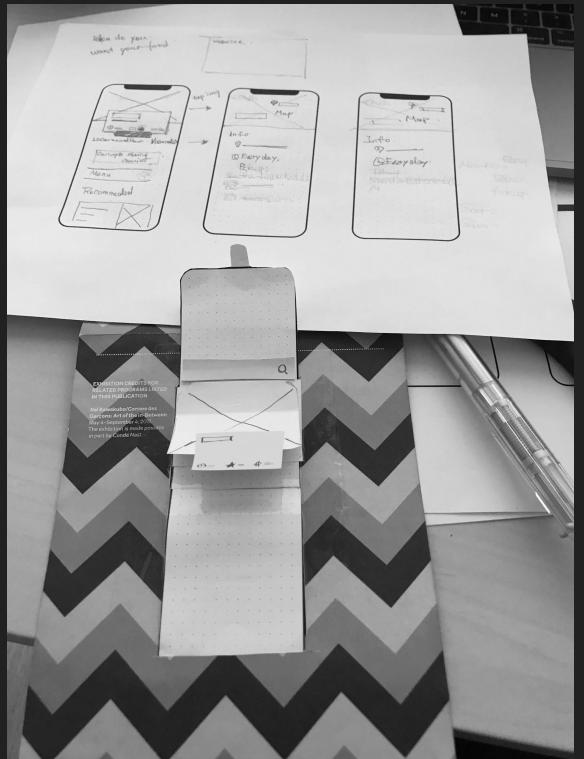

Review & Rating

- Would love to have more details showing in the restaurant page
- Want to see more reviews and food integration in the reviews
